Fibre Enclosures and Racks

FRE Fibre Optic Rack Enclosure— Static Sliding

AFL's range of Static Sliding (SS) Enclosures are proudly designed and assembled in Australia.

These enclosures are perfectly suited for communications racks where incoming cable movement in sliding enclosures becomes problematic. AFL Static Sliding Enclosures cater for a variety of cable types including loose tube and tight buffered cables. The range has various sizes, density and panel arrangements available to suit a variety of applications.

Features and Benefits

- Modular apertures to suit AFL flat or angled panels for various connector types, modes and densities
- Unique cable management system keeps the incoming cable fixed in place whilst ensuring fibre radius is maintained
- Internal fibre clips for managing incoming cables and terminated fibres
- Slotted rear cable entry brackets allow for efficient fixing of one or multiple incoming cables
- Double extendable ball bearing slide rails allow for smooth sliding tray mechanism and to provide maximum internal access
- Silkscreen panel locaters for ease of fibre identification

- A range of alternate faceplates available for higher density applications
- Rodent proofing kits for single or multiple cable entry configurations to ensure network integrity in rodent-prone areas
- Multiple cable entry configurations available to suit a range of cable types and arrangements

Applications

- Fusion splicing of loose tube or tight buffer cables
- Direct termination of tight buffer cables
- Low volume through to high-density applications
- AFL SD MTP® Cassettes
- Ideal for highly populated telecoms racks
