

## DOSSERT®

### Type RLL-E Renewable Limiter Link Coupler

A renewable type limiter link coupler for connecting rubber or paper insulated cables on end and providing a fusible element for cable protection. The cables are securely terminated at each end by a compression connector provided with a tapered sleeve and compression nut; the combination of which establishes high mechanical advantage and electrical efficiency. The fusible links are readily replaced after clearing a faulted line. Circuit protection can be established at various current levels by choice of link ampere capacity.

#### Elements

TYPE NO.	NAME
1	Insulating Sleeve
2	Insulating Bushing
3	Limiter Mounting Block
4	Limiter Renewable Link
5	Socket Terminal
