

PRELIMINARY

The Fujikura Economy Fiber Scope utilizes a plastic ring illumination fiber and an economic silica-based image fiber. The user may also choose a plastic ring illumination fiber and a plastic image fiber as desired. This simple assembly offers a low cost version of a fiber scope which can extend the fiber scope to single-use and cost-sensitive applications.

Characteristics

- Simple assembly
- Low cost
- Single use application is possible
- Plastic ring fiber works as a protection tube and light guide
